

# Siemens Flow Instruments – Index Pricing

The liners from Siemens Flow Instruments vary in terms of material and technical specifications – and thus differ with regard to benefits, features, usability and price. In the charts below you can see the price of each liner type stated as an index compared to other liner types. For MAG 1100 with flowmeter size DN 2 to DN 15 the index liner is ceramic. And for MAG 3100 with flowmeter size DN 25 to DN 2000 the index liner is EPDM. The chart is only a guide, liner pressure ranges and specification can have impact on the prices.
