

**New and extremely experienced  
Ultrasonic and radar level measurement**

# sitrans PROBE

SITRANS® Probe LU and SITRANS Probe LR set a new standard for 2-wire, loop powered ultrasonic and radar continuous level measurement. SITRANS Probe transmitters are ideal for storage vessels, process vessels, and open channels for water and wastewater, food, and chemical industries.

SITRANS Probe is the award-winning Milltronics® The Probe® taken to a higher level. Its improved signal-to-noise ratio results in a longer measurement range. The enhanced patented Sonic Intelligence® echo processing ensures reliability and plug-and-play performance.

With the experience of over a million wide-ranging field applications and nineteen patents, SITRANS Probe LU and SITRANS Probe LR provide superior functionality and superior performance using two level technologies - your application decides the technology.

The new SITRANS Probe - a million in one!
