Weighing electronics

Weighing modules

SIWAREX FTC

Overview

SIWAREX FTC weighing module

The SIWAREX FTC (Flexible Technology for Continuous Weighing) is a versatile and flexible weighing module for conveyor scales. It can also be used to record weights and measure force. The SIWAREX FTC function module is integrated in SIMATIC S7/PCS7, and uses the features of this modern automation system, such as integral communication, diagnostics and configuration tools.

Note: Start of delivery 12/2004.

Benefits

- Uniform design, and totally integrated communication through integration in SIMATIC S7 and SIMATIC PCS 7
- Uniform configuration with SIMATIC
- Direct use in the SIMATIC automation system
- Use in distributed plant concept through connection to PROFIBUS DP via ET 200M
- Measurement of weight or force with high resolution of 16 million intervals
- High accuracy 3 x 6000 d, legal-for-trade OIML R-76
- Display with SIMATIC standard operator panels
- Parameterizable inputs and outputs
- Parameterizable for highly versatile situations
- Flexible adaptation to different requirements with SIMATIC
- Simple adjustment of scale using the SIWATOOL FTC program
- Replacement of module without renewed adjustment of scale
- Recording of weighing sequence
- 8 totalization memories with different digit intervals
- Use possible in Ex applications

Application

The SIWAREX FTC weighing module is the optimum solution wherever high demands are placed on the conveyor scale. As a result of its exceptional measuring properties, weights can be measured at high accuracy in up to three ranges. With force measurements, the value can be recorded bidirectionally.

Typical applications of the conveyor scale are, for example:

- Recording of belt occupation
- Recording of flowrate
- Recording of conveyed quantity
- · Loading of material

The flowrate of the material can be regulated using the control functions integrated in SIMATIC.

Design

The SIWAREX FTC is a function module of the SIMATIC S7-300 and can be snapped directly onto the SIMATIC S7-300 or ET 200M backplane bus. The installation/cabling requirements of the 80-mm wide weighing module are extremely low as a result of the DIN rail assembly and snap-on technique.

A standard 40-pin front plug is used to connect the load cells, the RS 485 serial interface, the analog output and the digital inputs/outputs, a 9-pin Sub-D plug to connect the PC (RS 232), and a separate 2-pin plug to connect the power supply.

Operation of the SIWAREX FTC in SIMATIC means that complete integration of the conveyor scale into the automation system is guaranteed.

Function

The main tasks of the SIWAREX FTC are highly exact measurement of the actual weight in up to three measuring ranges, and exact calculation of the belt load and the conveyed quantity. In the "Force measurement" mode, the force is recorded bidirectionally.

The conveyed quantity can be recorded in 8 totalization memories. However, integration in SIMATIC means that it is also possible to directly control the work of the conveyor scale by means of a PLC program. This means that the tasks can be meaningfully divided: the weighing functions are implemented in the SIWAREX FTC, the interlocking and logic functions for the plant and belt control in the SIMATIC CPU.

Weighing functions

The following operating modes can be set:

- Weight measurement and force measurement
- Conveyor scale

SIWAREX FTC can measure the input signals at high resolution both bidirectionally (+/- 100%) and unidirectionally.

In the "Conveyor scale" mode, calculations are carried out which are typical for this mode:

- Speed of the belt
- Belt load
- Flowrate
- Conveyed quantity (in 8 totalization memories)

The SIWAREX FTC weighing module monitors the statuses during the weighing process, and informs the operator of any irregularities. The optimized exchange of data within SIMATIC permits direct evaluation of the load cell signals in the PLC program.

The SIWAREX FTC is already factory-adjusted. This means that the theoretical adjustment of the scale is possible without adjustment weights, and that modules can be replaced without readjustment of the scale. When using "active bus modules", replacement is also possible during operation.

Weighing electronics Weighing modules

SIWAREX FTC

Example application of the SIWAREX FTC

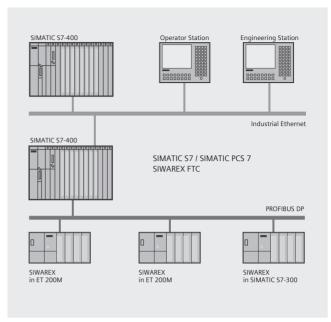

Integration in SIMATIC

SIWAREX FTC is completely integrated into the SIMATIC S7 and SIMATIC PCS 7. Users can configure their automation solution completely freely – including the weighing application.

Appropriate combination of SIMATIC components means that optimum solutions can be found for small, medium-size and large plants. The scales are operated and monitored using SI-MATIC standard operator panels. These operator panels (also touch panels such as the TP170B) can of course also be simultaneously used for operation and monitoring of the plant.

Customized or sector-specific solutions can be developed extremely quickly using the configuration package and example applications for SIMATIC. The following Fig. shows a typical configuration of a medium-size plant.

The ready-to-use function blocks for the automation system and the faceplates for the operator station are used for the configuration in SIMATIC PCS 7.

SIMATIC S7/PCS 7 configuration with SIWAREX FTC

Software

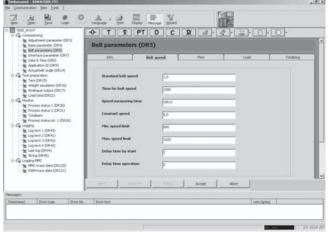

Adjustment of the scale using SIWATOOL FTC

SIWATOOL FTC is a special program for adjustment of the scale, and executes with Windows operating systems.

The program permits adjustment of the scale without knowledge of the automation system. When servicing, the technician can analyze and test the procedures in the scale using the PC. Reading out the diagnostics buffer from the SIWAREX FTC is extremely helpful when analyzing events.

The following work, inter alia, can be carried out using SIWATOOL FTC:

- Parameterization and adjustment of the scale
- Testing of scale properties
- Saving and printing scale data
- Recording and analysis of weighing sequence

SIWATOOL FTC adjustment software

It is also extremely helpful to analyze the diagnostics buffer which can be saved together with the parameters following reading out from the module.

Weighing electronics

Weighing modules

SIWAREX FTC

The SIWAREX FTC weighing module includes a trace mode for checking of weighing sequences. The recorded weight values and associated statuses can be displayed as traces using SIWATOOL FTC and MS Excel.

Upgrading of firmware

A further program function can be used to download a new firmware version onto the SIWAREX FTC on site. This means that firmware upgrades can be carried out on site and worldwide as required.

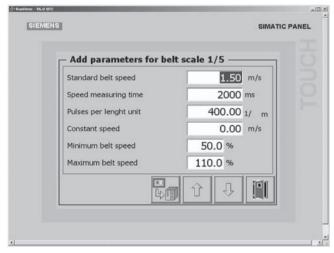

Reading out of weighing reports

The totalization memories can be saved on a MMC (Micro Memory Card) inserted into the SIWAREX FTC.

SIWAREX FTC - simple configuring

Integration in SIMATIC can result in freely-programmable, modular weighing systems for conveyor scales which can be modified according to operational requirements.

To facilitate incorporation of the module into the STEP 7 program and as a basis for application programming, the ready-to-use SI-WAREX FTC software "Getting started" is available free-of-charge in addition to the configuration package. A SIWAREX FTC conveyor scale can then be simply implemented in SIMATIC and a touch panel (TP/OP 170/270/370) as the operator panel.

Technical specifications

recinical specifications	
SIWAREX FTC	
Use in automation systems	
• S7-300	Directly or via ET 200M
• S7-400 (H)	Via ET 200M
• PCS 7 (H)	Via ET 200M
Communications interfaces	SIMATIC S7, RS 232, RS 485
Module parameterization	Using SIMATIC S7
	Using SIWATOOL FTC software (RS 232)
Measuring properties	
EC type approval as non-auto- matic weighing machine, trade class III	3 x 6000 d ≥ 0.5 μV/e
 Internal resolution 	+/- 8 million parts
• Internal/external updating rate	400/100 Hz
Several parameterizable digital filters	Critically dampened, Bessel, But- terworth (0.05 20 Hz), mean value filter

Weighing functions	
Non-automatic weighing machine, force measurement	

• Conveyor scale

Load cells	Strain gauges in 4-wire or 6-wire system
• 3 characteristic value ranges	1, 2 or 4 mV/V
Load cell powering	
$ullet$ Supply voltage $U_{\mathbb{S}}$ (rated value)	10.3 V DC
Max. supply current	184 mA
Permissible load cell resistance	
- R _{Lmin}	> 56 Ω > 87 Ω with Ex interface
- R _{Lmax}	\leq 4010 Ω

Max. distance of load cells

When using the recommended cable:

• Standard 1000 m (500 m legal-for-trade)

In hazardous area ¹)

- For gases of group IIC 300 m

- For gases of group IIB 1000 m

Connection to load cells in Ex zone 1 Optionally via SIWAREX IS Ex interface

Ex approvals zone 2 and safety ATEX 100a, FM, UL, cUL_{US} Haz.

Loc. (all available soon)

EC type approval, OIML-R76

Power supply

Rated voltage
 Max. current consumption
 Current consumption from backplane bus

Inputs/outputs

Digital inputs
 Digital outputs
 Counter input
 T DI electrically isolated
 B DO electrically isolated
 Up to 10 kHz

Analog output

- Current range 0/4 to 20 mA- Updating rate 100 Hz

Approvals
For NAWI mode

Degree of protection to DIN EN 60529; IEC 60529

Climatic requirements

 $(T_{\min (IND)} \dots T_{\max (IND)})$ (operating temperature)

Vertical installation Horizontal installation

Horizontal installation -10 ... 40 °C
 EMC requirements EN 61326, EN 45501, NAMUR NE21, Part 1
 Dimensions in mm 80 x 125 x 130
 Weight 600 q

IP20

-10 ... 60 °C
